

Gourav Ojha

Product Engineer · Full Stack Developer

India · gourav@email.com · github.com/gourav · linkedin.com/in/gourav

Summary

Product Engineer who builds scalable digital products with modern technologies. Experienced in full-stack development, SaaS architecture, and building production-ready applications across transportation, healthcare, education, and fitness domains.

Projects

Flysta — Enterprise SaaS

Transportation & Logistics

Transportation Management System for managing logistics workflows — LR creation, manifest management, real-time tracking, POD delivery, role-based access, and reporting.

Stack: [React](#) · [TypeScript](#) · [Tailwind CSS](#) · [Node.js](#) · [Express.js](#) · [PostgreSQL](#) · [JWT](#)

Forgeo — Developer Growth Platform

EdTech

Mission-based learning platform that teaches engineering thinking through real-world challenges rather than tutorials. Interactive coding challenges, progress tracking, skill gap analysis.

Stack: [React](#) · [TypeScript](#) · [Tailwind CSS](#) · [Node.js](#) · [PostgreSQL](#)

NutriLab — Healthcare SaaS

Healthcare

Complete clinic management platform for nutritionists. Patient registration, appointment scheduling, meal planning, PDF prescriptions with QR verification, multi-role access (6 roles).

Stack: [React](#) · [TypeScript](#) · [Node.js](#) · [Express.js](#) · [PostgreSQL](#) · [JWT](#)

FitFlow — Desktop Software

Fitness

Offline-first gym management desktop app built with Electron. Member management, attendance, billing, trainer scheduling, local SQLite with future cloud sync.

Stack: [Electron](#) · [React](#) · [TypeScript](#) · [Prisma](#) · [SQLite](#)

Skills

Frontend: [React](#), [TypeScript](#), [Tailwind CSS](#), [JavaScript](#), [HTML](#) & [CSS](#)

Backend: [Node.js](#), [Express.js](#), [REST API Design](#)

Database: [PostgreSQL](#), [Supabase](#), [SQLite](#), [Prisma](#)

Tools: [Git](#), [GitHub](#), [VS Code](#), [Figma](#), [Electron](#)

Languages: [JavaScript](#), [TypeScript](#), [Python](#)

Engineering Journey

2021 Began Programming

Started learning programming fundamentals.

2022 Web Development Foundations

Learned [HTML](#), [CSS](#), [JavaScript](#). Built interactive pages.

2023 React & Modern Frontend

Component-based architecture, state management, routing.

2024 Full-Stack Development

[Node.js](#), [Express](#), [PostgreSQL](#). End-to-end application development.

2025 Building Production Products

SaaS applications for logistics, healthcare, and education.

2026 Deepening Engineering Expertise

System design, backend scalability, AI integration.
